We will strive to give you the best support that we can with a personal level of attention to your account. Lauts Unlimited servers are hosted at a Tier1 Data Center in Chicago, IL. Providing the most protection possible for your site. The data center is staffed 24/7/365. The data center sits on top of three power grids and has backup generators and battery backup support. Numerous muti-ton cooling units make sure the temperature and humidity are constant. The data center has 24/7/365 has physical security with both ccTV, video recording and human patrol.
